

Energy Engineer - Entry Level

Are you a recent graduate in engineering or mathematics?

Were you at the top of your class academically?

Are you interested in a career in green Energy?

If so we want to speak with you:

Energy Reduction Solutions, Inc. (ERS) has an entry level position for a degreed engineer to conduct energy audits on commercial and multifamily buildings. Such audits culminate in the preparation of a written report. The position, which is available in our White Plains office, has the following qualifications:

- 4 year degree in engineering or mathematics
- 1-2 years engineering experience preferred
- EIT desired
- Good writing and verbal communication skills
- Familiarity with energy modeling software a plus
- Experience with calculating payback analyses a plus

ERS is a consultancy serving private and institutional owners. The firm provides energy audits, retrofit management, and alternate energy feasibility studies. Headquartered in White Plains, New York with branch offices in Washington, DC, Miami, Los Angeles, and Chicago, ERS is comprised of over 15 LEED APs, CEMs, CEAs, PEs, and RAs.
