## **XEROGRAPHIC ENGINEER**

**Location:** SOUTHERN CALIFORNIA

**Company Name:** Clover Technologies Group

Due to continued growth, we are currently seeking an experienced professional to assume the position of Xerographic Engineer on our Research & Development team located in Thousand Oaks, California. The Xerographic Engineer will be responsible for assisting the senior R&D staff in qualifying replacement components and developing processes for the remanufacture of color laser toner cartridges. Activities include reverse engineering, product development and documentation, failure analysis and print test support in R&D lab.

**Position requires BS degree or greater (Electrical or Mechanical) and exceptional engineering skills including the following:**

- Use MS Office Tools including Word, Excel and PowerPoint
- Ability to conduct component parts tolerance studies
- Familiarity with engineering materials including plastics, rubber, metals
- Fixture and prototype making – machine and hand tools
- Failure analysis and performance improvements
- Desire and ability to learn new technologies
- Excellent written and oral communication skills
- Use analytical equipment such as balances, densitometer, microscope
- Follow instructions exactly
- Strong work ethic and high energy

**Experience in the following areas a plus but not required:**

- Functional understanding of toner, developer rollers, blades and photoconductors
- Electrophotographic development systems
- Functional understanding of toner, developer rollers, blades and photoconductors
- Print quality analysis – able to identify root cause of print defects
- Solid Works and/or ACAD~

Clover Technologies Group offers a very competitive compensation & benefits package. We are seeking a proven engineer with a mechanical or electrical engineering degree. Preferred candidates will have a minimum of 2-4 years of experience related to the design and manufacturing process of laser toner cartridge systems and printers. Collaborating to develop product

solutions is essential. Solid analysis and complex problem solving capabilities required. Overnight travel will be required (25%). Valid passport is required. Bilingual skills (English/Spanish) is a plus.

Salary: DOE

Date this job was posted: July 13, 2011
