

Tami Regulski

Tami Regulski has been with Binghamton University for two years. She trains and supports Blackboard and also trains and is very knowledgeable about all of the Microsoft Office desktop programs.

Tami has worked in IT and as a trainer for 11 years. She worked in the IT department at a local manufacturing firm where she worked extensively with the frontend and backend of their manufacturing software, which is similar to Oracle. She used this software and Access to create reports for HR, Sales, Accounting, Inventory Control, senior management and the President. She also regularly trouble shot problems with user's PCs, printers and the company's LAN. Tami has also trained computer hardware and technology in a higher education setting at a local business school.

Tami's undergraduate degrees specialize in computer technology and teaching. She graduated from Broome Community College and earned her Bachelor's in Education with a Computer Science concentration from SUNY Oneonta where she graduated with honors in education.
